#### Claim 1

Document 1: Ichiro Shoji et al., "(100)-cut no YAG kesshou ni yoru netsu fukukussetsu yuuki depolarization no teigen," Dai-62-kai ouyou butsuri gakkai gakujutsu kouenkai yokoushuu, 1 September 2001, Vol. 3, page 799

Document 1 indicates that depolarization can be reduced in YAG crystals by selecting a plane other than the (111) plane as the direction of propagation of light.

A person skilled in the art could easily conceive of selecting the (110) plane as a plane other than the (111) plane, and thus, the invention described in claim one does not involve an inventive step.
